Outline

Apache Camel

Examples

What?

- ▶ open source integration software

Why?

- ▶ soft need to communicate
- ▶ but do not need to be aware of that

How?

- ▶ Modularity
- ▶ 'there is a component for that'

Vocabulary

- ▶ Message

What transits between endpoints.

- ▶ Endpoints

Determines the origin or the destination of an exchange message

- ▶ Routes

A message transits from one endpoint to one or more endpoints.

- ▶ Components

- ▶ file
- ▶ split
- ▶ translator
- ▶ aggregator
- ▶ ...

Basic route

```
from("file://dummy").  
  to("file://some-other-directory");
```

With split of the message

```
from("file://dummy").  
    split(new XPathBuilder("//families/family")).  
    to("file://some-other-directory");
```
